

M. RAQEEM AFZAL

ABOUT ME

"I am a student in BS-CS program with programming skills and a passion for technology. I have completed several programming projects that have helped me develop problem-solving and analytical abilities. I am eager to start my professional career in a challenging environment where I can grow and contribute."

EXPERIENCE

Employee Management System | Project showcase

- I'm pleased to share an Employee Management System I recently developed to apply core concepts of C#, Object-Oriented Programming, DSA and database design in a practical setting.

It is a C# Winform UI Design with responsive, anchored layouts for desktop environments

Basic URL shortener Project

- It is a basic C++ Program with the core concept and project of DSA. It is a single display program in which user enter a long Url and with the help of hashing table it is gets shorter. It can also reverse that short Url to long Url.

Pacman Game Project

- "Designed and developed a Pacman game in C++ during Programming Fundamentals. Implemented game mechanics including movement, collision handling, and scoring system. Gained hands-on experience in problem-solving and structured programming."

EDUCATION
